

Prime Technology  
P.O. Box 185  
344 Twin Lakes Road  
North Branford, CT 06471

**Prime Technology**, a longtime member and supporter of the Submarine Industrial Base Council, is the council's featured member this year.

<http://www.submarinesuppliers.org/>

Established in 1992, the Submarine Industrial Base Council seeks to educate policymakers and the public about the nation's ability to design, build, and maintain submarines. SIBC membership is ongoing and open to the more than 5,000 U.S. companies that provide critical materials to the Virginia-class submarine program. Member businesses range from the smallest specialty shops to manufacturers of main propulsion equipment. Shipbuilder General Dynamics Electric Boat Corporation provides funding for administrative support.

Prime Technology, based in North Branford, CT, is a precision measurement company in the areas of pressure, temperature and time. Serving the military, nuclear, and commercial market, Prime has solidified itself as an industry leader by leveraging its expertise in custom engineering and manufacturing. These capabilities, coupled with the company's six diverse divisions, allow Prime to reside at the cutting edge of technical innovation in its field.

Prime's mission is to design and manufacture instruments and electronic systems through innovative engineering in order to surpass its customer's needs and expectations.
